1. Applicant's arguments, see the after final amendment, filed November 22, 2003, with respect to the claims have been fully considered and are persuasive. The rejection of the claims has been withdrawn. The arguments caused examiner to consider whether the apparatus described is capable of handling the at least 10 psig claimed in claim 163 and the obviousness of the features missing from the rejection of claim 178 and the claims dependent from these two claims. With regard to the pressure, examiner was not able to find that the valve means in the applied references are capable of handling the required pressure.
